

VB400

BODY-WORN CAMERA

The VB400 Body-Worn Camera brings a unique first-person perspective to video content, for varied uses from employee training, to public safety. See what your team sees and watch key decisions unfold, either in real time or after the fact.

In the field, features including dual microphones, a wide-angle lens and intuitive buttons ensure that every interaction can be captured in high-definition from start to finish.

All footage is stored and encrypted on the VB400 until it is redocked, at which point it is offloaded securely and automatically.
